

MEMORANDUM

TO : Steve Lutz, City Manager
FROM : Rob Rice, City Engineer
DATE : March 20, 2002
RE : Home Road Bridge Replacement

During last evening's Council meeting, Mr. Wiencek inquired as to the schedule for the upcoming Home Road Bridge Replacement project. I placed a call to Mr. Scott Pike, the Assistant Delaware County Engineer. He was able to provide me with the following information:

This past January, the County entered into a contract to have the existing bridge demolished and a new one constructed (with a slight realignment). The construction operation is anticipated to begin in mid-April 2002 and continue through July 2003, during which time there will be no access across the river at Home Road. Traffic will be officially detoured to the crossing at SR 42, although motorists may also cross at Glick Road. Message boards indicating the exact start date are to be placed approximately two weeks prior to commencing the project.

Hopefully this provides sufficient information. If needed, Mr. Pike may be reached at (740) 833-2404 for further details.
