## Hardy Plank

The home builder shall follow the following procedure and stipulations when installing Hardy Plank:

1. Engineered studs shall be used on all exterior walls where Hardy Plank is to be installed. These are the straightest studs available in the market.
2. OSB board will be installed on the outside of the engineered stud walls. This oriented strand board is wood particle that are glued together. This is a very strong board that allows Hardy Plank to be nailed into the OSB board without the necessity of finding studs.
3. Tyvek wrap will be applied to the OSB board to eliminate moisture penetration. This helps to keep the walls dry and straight.
4. Hardy Plank will then be installed over the tyvek wrap.
